Education

Jaypee Institute Of Information Technology	Aug 2019 - May 2023
Bachelor of Technology in Computer Science Engineering(CGPA: 7.8 / 10)	*Uttar Pradesh, India*

Experience

Reliance Jio Platforms Ltd.   Jun 2023 – Ongoing
Software Developer Engineer   *Bengaluru*

- Currently developing an gaming application for JioGames, which will include JioGames Cloud Gaming and Jio Watch for Samsung Smart TV, using React.js on the Tizen platform.
- Refactored the code base for the **play.jiogames.com** to support bite-sized HTML games from Google Gamesnacks and successfully transitioned the project from beta to production.
- Migrated the **Jiogames.com** application from React.js to Next.js, resulting in improved performance metrics for core web vitals on Google PageSpeed Insights, achieved over 95% accessibility using accessibility features, and attained 100% SEO on the Google Lighthouse platform.
- Developed the front-end for Sandesh (automated configuration system), replacing the WIT ACS console and finalizing Jio's own RCS platform.
- Developed a React.js based front-end for a CRM serving JioGames backend to manage various services related to adding games, creating storefronts, and mapping them to different templates. Used RTK query and Redux features for seamless fetching the data API's and storage management

Projects

CodeWithGuptaJi ○ | *React.js,Node.js,Express.js,MongoDb,HTML,CSS*

- Designed and developed an Ed-tech platform enabling administrators, instructors, and students to perform essential operations. Implemented instructor capabilities to upload lectures, allowing students to purchase and view them seamlessly within a single application environment.
- Used Node.js and Express.js to build MVC architecture for the backend, integrating MongoDB as the DBMS.
- Built a high-performance, interactive frontend using React.js. Used state management techniques, Redux, and routing for smooth functionality.
- Integrated Razorpay payment services for seamless transactions

Social media web application ○ | *Node.js,Express.js,MongoDb,HTML,CSS*

- Designed and implemented a back-end service for real-time chat solution using Node.js and Socket.io for a social media web application.
- The application is secured using Passport.js authentication middleware, resulting in robust and reliable user authentication and authorization.
- Designed the application using MVC architecture, with the view interface integrated through EJS templates.

Achievements

Nagarro's Bootcamp: Selected for Nagarro's bootcamp and scored 10/10 in Data Structures and Algorithms (DSA)
DSA Problems: Solved 500+ DSA problems on different platforms including Leetcode,GFG etc.

Skills

Languages: English, Hindi
Programming Languages:C/C++, Javascript, SQL
Development Frameworks: React.js, Next.js, Express.js, Node.js
